

Babloo Kumar Sah

GenAI-Powered Full-Stack Engineer(Vibe Coding Engineer) | AI, ML, LLM, Evaluation & QA Automation

Designing, evaluating, and delivering AI-driven full-stack applications with strong focus on automation, quality assurance, and production-ready systems.

bablooshahcse@gmail.com | +91-7888632265 | New Delhi, India | Open to Remote (US/EU)

Professional Summary

End-to-end GenAI-powered Full-Stack Engineer with hands-on experience in building, integrating, and delivering AI-driven products. Strong background in LLM-based systems, RAG architectures, chatbot development, and full-stack web applications. Experienced in owning complete product lifecycles—from idea and architecture to AI integration, automation, and production delivery—allowing clients to ship faster without managing multiple teams.

Core Skills

Languages: JavaScript, TypeScript, Python, SQL, Bash

GenAI / AI / LLM: LLM Integration(OpenAI, Anthropic, Gemini, Mistral), RAG, Fine-tuning (LoRA/PEFT basics), LangChain, Prompt Engineering, Memory-Based Chatbots, AI Agents, Vector Embeddings, Embedding Generation & Vector Search, Response Evaluation & AI Output Validation, Model Routing & Fallback Strategies, Model Configuration via Admin Panels, Token Optimization & Cost Control, AI-Assisted Code Generation & Refactoring, Conversational Flow Design, LLM fine-tuning, LlamaIndex, Hugging Face

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS, Responsive UI Design, Component-Based Architecture, End-to-End Product Ownership

Backend: Django, FastAPI, Node.js, Express.js, PHP, CodeIgniter CI4, REST APIs, Authentication & Authorization (JWT, Role-Based Access), AI Workflow Orchestration, Prompt-Driven Development Workflows

Databases: MongoDB, PostgreSQL, MySQL, Supabase, Vector Databases (FAISS/Pinecone) Chroma – working knowledge), File Storage, Data Pipelines

AI Evaluation, Data Processing, Automation & QA:

- AI output evaluation, response validation & instruction adherence
- Function-calling validation (JSON/schema checks)
- Prompt behavior testing, edge-case analysis & hallucination detection
- Annotation, guideline-based reviews & quality consistency checks
- Web data extraction using Firecrawl API (page-wise website scraping & structured content parsing)
- Data processing, cleaning & transformation using Pandas, NumPy, BeautifulSoup
- Test automation with Playwright, Selenium, Pytest

AI Dev Tools: Cursor AI, Windsurf, Google Antigravity, Qoder AI, Emergent WindSurf, Trae, Wrap, Google AI Studio, V0.dev, Bolt.new, Lovable, Figma, Warp AI, AWS / GCP

Tools: Git, GitHub, Postman, Jira, Agile/Scrum,Docker, Kubernetes, Client Requirement Analysis

Experience

Metafic | GenAI / ML Engineer (Senior AI Engineer)

Bengaluru | July 2022 – Apr 2026

Worked as a Senior GenAI/ML Engineer, owning the design, development, and delivery of AI-powered products across frontend, backend, and AI layers. Acted as a single point of ownership for complete AI solutions.

- Designed and delivered LLM-powered chatbot platforms using RAG architecture, including document ingestion, embeddings, vector search, and response generation.
- Built LangChain workflows with prompt orchestration, tool usage, and memory-enabled conversations for better accuracy and context handling.
- Integrated Generative AI models into customer-facing and internal systems for Q&A, intent handling, and AI assistants.
- Developed backend APIs (Node.js) to support AI pipelines, authentication, and system integrations.
- Built admin panels and dashboards using React.js and Tailwind CSS for managing prompts, datasets, AI configs, and users.

- Worked with MongoDB and MySQL for application data, AI logs, and analytics.
- Used Cursor AI, Windsurf, and Google Antigravity to speed up development and improve code quality.
- Acted as single owner for end-to-end delivery, reducing dependency on separate AI, backend, frontend, and QA teams.
- Result: Enabled faster product delivery by owning AI, backend, frontend, and admin tooling within a single role.

Intelligaia Pvt. Ltd. | Full-Stack MERN Developer

Panchkula | May 2021 - July 2022

- Built full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Developed e-commerce platforms including product catalogs, cart flows, orders, authentication, and admin dashboards.
- Worked on project management tools, implementing task tracking, role-based access, and reporting features.
- Designed and integrated REST APIs for frontend-backend communication and third-party services.
- Collaborated with QA and product teams to deliver stable, production-ready releases.

Projects:

GenAI Chatbot Platform

- LLM-based chatbot using RAG and LangChain with document ingestion, vector search, memory, and admin UI.
- Built and deployed a production-ready AI chatbot demo platform: <https://bot.gosetle.com>
- Developed an LLM-powered conversational system using prompt engineering and RAG-based architecture
- Implemented real-time user query handling with context-aware responses
- Designed backend APIs for chatbot workflows using FastAPI / Node.js (based on your stack)
- Integrated LLM APIs (OpenAI/Anthropic) for dynamic response generation
- Enabled multi-turn conversations, memory handling, and structured outputs
- Focused on low-latency responses, scalability, and user experience

EdTech Platform (LMS + Live Classes)

- Tutor and student dashboards, course management, live class scheduling, and role-based access.

Financial Invoice & Receipt Software

- Billing system with invoice generation, receipt management, payments, and admin reporting.

AI Chrome Extension

- AI-powered profile analysis tool to generate insights before outreach using LLMs.

Dynamic Websites & Custom WebApp

- Delivered 20+ client projects with full-stack development and deployment.

Education

- IK Gujral Punjab Technical University Computer science and engineering (CSE) Punjab July 2015 - July 2019
Bachelor of Technology(B.Tech))
- Percentage: 69%

Certifications

- GenAI / ML Engineer – Coursera
- Prompt Engineering – Coursera
- Full-Stack MERN Developer – Coursera
- Figma & Playwright (JS/TS) – Udemy
- Python & Node.js – Naresh i Technologies

Honors & Awards

- Best software project in College Tech fest "PRAYOG" Second Position in web Development- 2017
